

Service Line Tensioner ATENSIONER

Reduce Manual Handling Injuries

Service Line Tensioner Part No: ATENSIONER

The ATENSIONER was specifically designed for lifting service cables & conductors ensuring correct clearance across roadways during installation.

- Climbing rope with non-slip negative lock that prevents rope slip
- **2:1 Lifting Ratio** reduces likelihood of manual handling injuries
- 4.5m of Rope*
- Labelled with Load Rating
- WLL 150kg

Australia - 1300 ASKTEN
New Zealand - 0800 ASKTEN

aTENSIONER : WLL 150kg
 aTENSIONH : WLL 300kg

**SAFETY TAG
DO NOT REMOVE**

Service Line Tensioner (Hauling Line) Part No: ATENSIONH

The ATENSIONH was designed to lift service line & conductor and also operate as a hauling line for lifting tools & equipment into buckets or up poles.

- Features a second pulley without negative lock mechanism
- 4.5m of Rope*
- Labelled with Load Rating
- WLL 300kg

* ATENSIONH can be made with any length of rope upon request.
Example Part Number: ATENSIONH-12 for 12m of rope.

Service Line Tensioner (Hauling Line with Swivel) Part Number: ATENSIONHS

The ATENSIONHS is the same as ATENSIONH but has a swivel joining the top karabiner to the non-slip negative lock that prevents rope slip. This prevents rope twist.

*ATENSIONHS can be made with any length of rope upon request.
Example Part Number: ATENSIONHS-12 for 12m of rope.
