

# 100 Ton Press Heads Double Acting

TEN's range of double acting press heads eliminate potential jamming of the ram on compression crimp sleeves.

They feature a removable die cap for easy connector positioning onto overhead conductors and a hoisting ring that is centred on the top of the unit for overhead distribution and transmission applications.

The simple design with minimal moving parts ensures easy, hassle free maintenance.

Also available with Skid Plate

## Specifications

Part Number #	<b>HYC-100</b>
Crimp Capacity (Ton)	100
Crimping Capacity Range	Cu > 64mm OD Sleeve Al > 71mm OD Sleeve St > 32mm OD Sleeve
Die Type	
Ram Stroke	22mm
Operating System	Double Acting
Weight (kg)	37
Height (mm)	380
Max Pressure PSI/Bar	10,000/700
Oil Required (cc)	314

Note – Crimping head only. Hoses, pumps and dies sold separately.

## Full range of Pumps, Hoses, Control Valves and Adaptors also available
