TEN Manufacturing - Canvas and PVC Solutions

TEN's range of quality Australian made storage solutions and accessories are industry proven and tested to stringent quality standards. A range of options are available including customised logos, identification numbers & warning labels. All our manufactured products use the highest quality materials.

PVC

Australian made 680gsm high tenacity PVC made in a tear stop construction commonly used in extra heavy duty tarpaulins. Tear stop design decreases the chances of a tear or cut in the material from increasing. The base fabric is lacquer coated for extra protection and dirt resistant. It is also flame retardant, mildew resistant and UV resistant.

Webbing & Stitching

Our heavy duty polyester webbing (also known as seat belt webbing) is used for its strength and low elongation under load. It is ideal for support banding and handles, it is light and strong minimising excess weight for the operator. All our stitching patterns and materials are designed to provide maximum strength and resistance to tears improving the durability and longevity of your storage solutions

Ultrasonic Welded Seams

TEN provides ultrasonic welded seams on selected PVC material bags. Equipment bags face the toughest Australian and New Zealand conditions exposed to the sun, rain, heat and cold. Sewn seam bags can take on water if water pools on top of seams. By utilising radio frequency energy to instantly heat the thermoplastic coating this enables the two sheets of PVC to be permanently fused together giving a water tight join.

Heavy Duty Canvas

Our Tear stop canvas has core spun threads woven throughout for added strength and resistant to damage. The fabric is 535gsm, UV and mildew resistant, features excellent shrink and colour control and is completely breathable minimising internal moisture build up. This canvas is made tough for the harsh Australian conditions and is commonly used in the transport industry.

What makes a TEN Tool bucket the toughest?
