

Conductor Covers

Will not warp or distort

MV Line Covers

- Easy to install/remove with shotgun stick on some models
- Adjustable attachment eye allows angled installation/removal
- Interlocking feature, male and female end
- 2 units wrap together saving storage space
- Guards will not warp or distort (UV stable)
- Manufactured to ASTM F968, tested to ASTM F712
- High visibility bright orange polyethylene

Shotgun Style Cover

Part No	Style	Length (mm)	Rating Ø-Ø (kV) Brush Contact Only	ASTM Class	Max Conductor OD (mm)	Weight (kg)
P406-0184	Plain (G&B)	1525	25	3	24	1.4
C406-0181 GA	Shotgun	1525	25	3	24	1.8
C406-0514GA	Shotgun	1525	36.6	4	24	2.4
C406-0557	Insulator Cover	300	5	4	--	1.3

Conductor covers are 5 feet long and are available with a Grip-All adapter for hot stick application or without adapter for rubber glove application.

C406-0181 GA with Grip-All Adapter

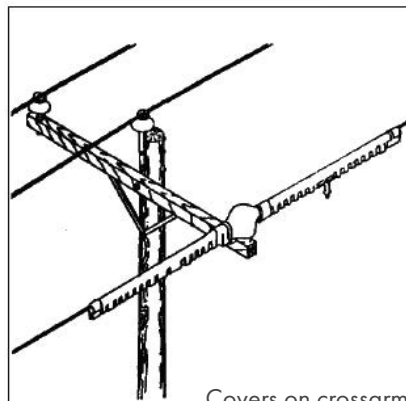

C406-0557
300mm Insulator Cover
(150mm length also available)

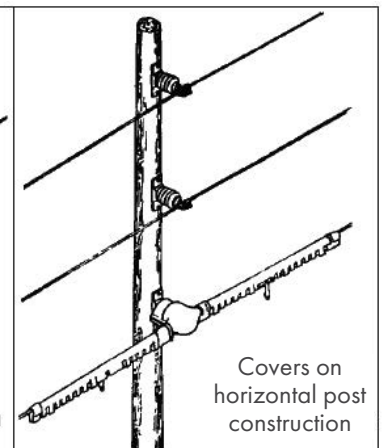

P406-0184 without Grip-All Adapter
for rubber glove application

These covers are made of high-density polyethylene and feature uniform wall thickness for excellent dielectric/puncture strength.

For easy application, the unique V-shape edge design helps locate the conductor and hardware together. A positive coupling mechanism lets you completely surround a variety of configurations with this system of only four pieces. For convenience on either rubber glove or hot stick applications, each piece comes with an adapter for multi-position handling by a Grip-All clampstick.

Covers on crossarm construction
