

# Transformer Containment Bags

## Transformer Containment Bags

- 100% Recyclable
- Manufactured from durable & strong woven recyclable polypropelene
- Tested to hold 6 times its rated capacity
- Employee & environmental safety
- Easily stored on crane truck
- Storm preparedness
- Avoid preventable spills
- Safely contain PCB's

Transformer Containment Bags

# Need a way to safely contain leaking transformers during transport?

- The ABG Bag is an easy to store on truck solution for safe transport and storage of faulty transformers from site to yard
- Avoid the transport and logistics cost of using large steel containers to transport leaking transformers
- Avoid the cost of contract crews pumping and draining transformers, as well as the cost to clean up leaks that occur during transport and storage
- When oil is drained in the field, it can damage the transformer and prevent repair. By not draining the units, more transformers are repairable and do not need to be replaced.
- Using the bulk bags significantly helps to reduce preventable spills that release unwanted oils into the environment
- Lift using reinforced lifting loops and secure for transport
- Can be secured to a pallet using the bag handles

PATENT PENDING

Part No	Style	Dimensions (cm)	Closure	Capacity
PT-22	Round	55 D x 65 H	65cm wide duffle & velcro closure	635kgs
PT-30	Round	75 D x 90 H	90cm wide duffle & velcro closure	860kgs
PT-42	Round	100 D x 120 H	120cm wide duffle & velcro closure	1020kgs
PMT-48	Rectangular	120 D x 120 H x 90 W	120cm wide duffle & rope closure	1360kgs
PMT-53	Rectangular	135 D x 115 H x 100 W	100cm wide duffle & rope closure	1587kgs
