

Ratchet Podgers

Folding Handle Dual Head Ratchet Podger

Part No: RPH1824

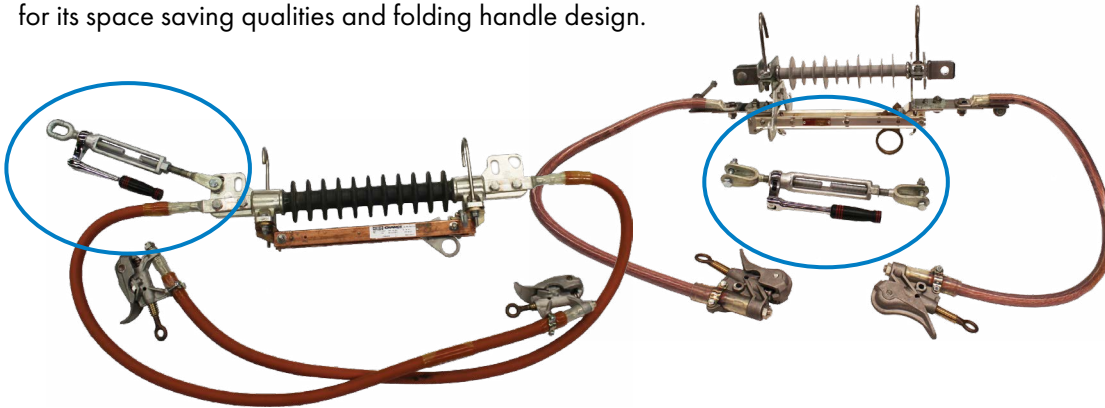

Part No	Size	Hex
RRP3236-H	18 & 24mm	12pt

The chrome RPH Podger from TEN is precisely machined, heat treated and zinc plated.

The unique folding handle allows greater positioning and application of the tool in tight spaces, and requires space for storage.

The podger ratchet consists of two drive socket heads of 18 & 24mm sizes within a heavy duty 32 tooth ratchet mechanism. Dual head ratchets allow speed and efficiency on the job.

TEN Group use the RPH1824 in the assembly of HV Inline Switches for its space saving qualities and folding handle design.
