

SqueeKleen Cable Cleaner

Gel and Pik Removal Wipe Part No: TC-1

SqueeKleen cleans and fans fiber in two wipes, saving time and money.

No follow up with alcohol is required to clean and separate fibers before splicing. It reduces chemical odours and keeps vapor concentrations to a minimum in splice trailers and vaults to ensure a safe environment.

Product Benefits

- **Effective Cleaner:** cleans cable filling gel and flooding compounds.
- **Cleans IBP Flooding Compound:** Good for cleaning coax cable.
- **Fast Gel Cleaner:** only two wipes and the fiber squeaks and fans.
- **No Residue:** Nothing left to require a secondary alcohol wipe.
- **Industry Tested:** Approved by users and manufacturers.

The SqueeKleen TC-1 is a durable, non-linting saturated towelette.

This wipe is the ideal package for field use because it limits vapor concentration and has no risk of spilling.
