

Wire Rope Ratchet Hoists

Lug-All Wire Rope Hoists

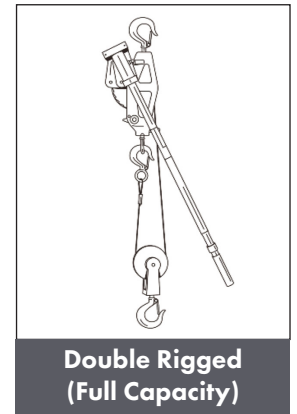

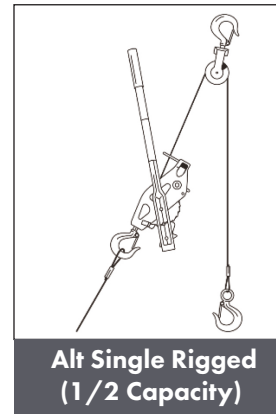

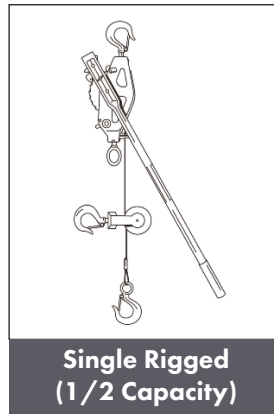

Part No: Various

All Lug-All cable hoists are made in the USA using aircraft cable and are designed with an aluminum alloy main frame with open construction for easy cleaning and maintenance. Lug-All cable hoists also include a handle that is designed to bend at 125 to 150 percent of the rated capacity, protecting the user and equipment. Super flexible, 133-strand aircraft cable and fast-connecting, 360° swiveling hooks with safety latches for quick, positive, loading and unloading

Features

- Lug-All wire rope hoists for lifting and/or pulling heavy equipment
- Reversible handle designed to bend on overload
- Use the entire cable length! The exclusive LUG-ALL swaged, ball-shank anchor locks the cables end into the drum
- Self lubricating bearings
- Quick release will not function when the cable is under load
- Non-slip interlocking pawl system
- Open Design – Easily inspected
- Marine-grade models available
- Aluminium alloy frame and drop forged steel hooks

LUG-ALL®
