

Integrated Management System Policy

Our vision:

“To be our customers first and last call”

The Energy Network (Australia) Pty Ltd, is an organisation that supplies quality tools and construction equipment to the wider energy industry, designs and manufactures canvas and PVC storage systems, and has an on-going commitment to quality, occupational health & safety, and environmental sustainability. In addition to complying with OHS and environmental legislation and legislation applicable to our products and services, this commitment means proactively:

Quality:

- Satisfying our clients by consistently meeting their requirements within the scope of our operations.
- Applying good professional practice throughout all aspects of the business at all times.
- Continually promoting and implementing improvement strategies across our resources and operations to drive business performance.

Occupational health & safety:

- Providing safe and healthy working conditions for the prevention of work-related injury and ill-health.
- Reducing the risk of work-related illnesses and injuries through removal or minimisation of identified hazardous.
- Continually promoting and applying improvement strategies throughout our organisation to progressively achieve a healthier and safer work environment.
- Ensuring all employees (representatively or collectively) are consulted and participate in the development, planning, implementation, performance evaluation and actions for improvement, in all aspects of our occupational health & safety management system.

Environment:

- Preventing, eliminating or minimising the production and/or discharge of pollution, and where possible, bringing influence to bear in preventing, eliminating or minimising the production and/or discharge of pollution occurring outside the Organisation's control.
- Continually promoting and applying improvement strategies in our resolve to preserve the natural environment.

Commitment:

- To demonstrate our commitment to quality, occupational health & safety, and environmental sustainability, we have implemented a management system that is certified to the requirements of the following industry standards:
 - ISO9001 Quality management systems – Requirements.
 - ISO45001 Occupational health & safety management systems – Requirements with guidance for use.
 - ISO14001 Environmental management systems – Requirements with guidance for use.
